

How to Trade - Carryover

Water Partners has a live online carryover trading room for the benefit of all its customers. This allows traders to upload an offer that can be viewed online and accepted by other traders. Although 'live' offers can be viewed by anyone, to upload an offer or accept an existing offer, each trader must complete the registration process completely. If you do not have an email address, please contact Water Partners and our helpful staff will work with you to access the live trading environment.

The Water Partners Carryover Traderoom is the first of its kind and is designed to create a market-driven price solution for participants.

Registration

- Simply click on the **Registration** button on the Water Partners homepage.
- When prompted, select the relevant option for a new or existing trader.
- Accept Water Partners Trading Rules and Terms & Conditions.

New Trader

- All information must be provided at Registration.
- The Trading Entity is the name of the entity in which your entitlement is held.
- Your ABN is your Australian Business Number issued by the ATO. If you do not have an ABN and are a seller of water, you will be required to complete a 'Statement by Supplier' form. A link to this form can be found at the bottom of the Registration page.
- All address and contact details must be completed in full, including a valid email address and telephone number.
- Multiple contact details can be added with one contact identified as the 'Primary Contact'.
- Please ensure that all information is correct when completing the Entitlement Details section of registration.
- Once all contact details and Entitlement Details have been completed, each trader must click the **Submit** button.
- An email will be sent to each trader confirming that their Registration has been successful but that certain evidence of entitlement ownership must be provided to Water Partners, together with the appropriate authority to act before trading can proceed.
- A valid ABA account must be provided to trade. The ABA details will be verified by Water Partners staff to authenticate ownership and validity.
- A **Form 39b** must be completed in full by all holders of the ABA provided in order for Water Partners to have authority to act on behalf of traders when transferring water.
- If the ABA is in a Company name, or the person registering has Power of Attorney, Water Partners will require Company Extracts and a certified copy

of the Power of Attorney Document. Failure to provide these documents will delay registration.

- Once Water Partners receives the necessary documents, each trader will receive their log-in information, via email, together with a temporary password. Upon initial log-in, the trader will be prompted to change their password to something of their choosing.

Existing Trader

- If your trading information is registered with Water Partners, simply select the 'Existing Water Partners Customer' option at Step 1 of Registration.
- Trader information will be identified with an email address.
- If the trader's information is successfully matched to the Water Partners system, a pop-up message will appear informing the trader that they have successfully registered, and a Password and Trader ID will be emailed to them once Water Partners has confirmed possession of a **Form 39b** and/or any other documents that may be required.
- If a 'Registration Warning' is issued, the trader may have more than one trading entity registered under the entered email address. If this occurs, the trader should contact Water Partners to clarify.
- If a 'Registration Fail' is issued, Water Partners has no record of the nominated email address. Traders should either contact Water Partners or proceed with Registration as a new trader.

My Water

You can only view 'My Water' once you are logged in.

Current Offers

- This section lists your current live offers, and you may edit those offers from this section.

Entitlements

- This section lists all the entitlements that you have registered. It will also show you if the entitlement has been approved by Water Partners.

History

- All your trades will be listed, whether expired, deleted or traded. You can search your past offers by Trade Type (e.g., Allocation, Permanent or Carryover), Offer Type or date range.

My Details

- In **'My Details'** you can maintain your details including contact details and address. More importantly, this is where you can **add or adjust any water entitlement information** for trading purposes. Documentation will need to be provided to Water Partners for all new entitlements and the entitlement will be 'Pending' until approved by Water Partners via evidence of ownership. You will receive an email outlining the steps that need to be taken.

Reset Password

- If you choose to alter or reset your password, you may do so in this section.

Offer Creation

- Once you are registered and logged-in you are capable of entering an offer to the Traderoom
- Upon log-in, you will automatically be taken to 'My Water'.
- If you wish to add an offer you may select "Add Space Wanted Offer" or "Add Space Available Offer"
- Entitlement details must be selected from the drop-down list.
- You must then enter how many megalitres (ML) of space wanted or available together with the price you are looking to receive (or pay) per ML.
- The offer can remain on the Traderoom for up to 90 days. You must select how long you wish their offer to remain live.
- In some cases, you may split your trade, by volume, to attract more buyers or sellers. Please ensure that the relevant box is ticked.
- If 'Yes' is ticked, it is necessary to indicate how many ML per split you wish to have and also the minimum number of ML you wish to remain in your final split. E.G. If a trader has 100ML they wish to sell, they may be willing to sell in increments of 20ML but want the minimum of the final sale to be 40ML. *Please note: -extra water authority fees will apply if trades are split.*
- Once all the information has been entered, click the Submit button. This step will automatically run a Feasibility check. If the Feasibility check is successful, the offer will proceed to the Traderoom ready for matching. If the Feasibility check is unsuccessful, you will be notified via an on-screen message. In that circumstance, it may be necessary for you to confirm the entitlement details and the megalitres you have offered. Water Partners will assist if you have any problems at the Feasibility stage.
- You will also be informed of the potential fees for your trade once trade details have been submitted. You will be required to press 'Confirm' for your offer to become live.

Offer Acceptance

- Once logged in, you will be taken to 'My Water' where you will see lists of space available or space wanted.
- Offers in the Traderoom will be listed under the **'Space Available'** tab and **'Space Wanted'** tab. These will be available for anyone to view.

- Each offer will have an 'Accept Offer' button option. No offer can be accepted until you are logged-in
- To accept an offer, simply press the "Accept Offer" button and follow the steps.
- The next screen will outline the details of the offer you have accepted, and you will be provided with a screen outlining the fees involved in the trade. You will need to confirm your acceptance at this point.
- Upon confirmation, the system will automatically run a Feasibility check to ensure that the trade can take place. (Feasibility checks will ensure such things as the trader having sufficient allocation and that the water is tradeable between the allocated zones).
- If you are the 'Acceptor' of the offer, an Invoice or Remittance Advice (depending on whether you have or need space) will be automatically generated. If the 'Acceptor' is purchasing, they will be required to pay their invoice within 48 hours. If the 'Acceptor' is selling, payment will be made to them once the water has been returned to the Owner. The return of the water will not occur until July of the new irrigation season for LRWS or when a "Low risk of spill" has been announced for water carried over against HRWS

Trading on Water Partners 24/7 electronic Carryover Tradersroom is instant, with immediate trade feasibility and lodgement processes and to get you started we are here to assist.
